Title: Bridge!

Genre: Casual, Simulation, Strategy

Developer:

toxtronix interactive GmbH

Publisher:

Aerosoft GmbH

Release Date: 1 Apr, 2011

English,French,German

cannot change the default language from what appears to be german/dutch. might be interesting if i could read the commands.. The package Bridge! has been permanently removed from your account. 0/10. Physically cannot play the game the menu loads for 1 full second and then all the text is gone as well as all textures and anything else required to play the game.. This game is unexplainably HORRIFYING and TERRIBLE beyond words there are black and white strobe lights always when I open the game (and when I live in a house with someone that has epilepsy this is NOT OK) the default language is Dutch so you have to go through a DAMN maze to find english because NONE of the options to select say anything and its MAJORLY PRONE to crashes every 30 seconds and then it tells you you do not have this game so you have to restart steam every tim you wanna play. I have nothing to say about the gameplay cause I was never able to get past the main menus since there wernt any labels. SO YEP THATS MY REVIEW in my opinion these devs just need to stop if this is what they created.. Looks like it should be good fun but it's not. Gameplay is dated and clunky with frequent glitches, awkward anchor points and occasional invisible components. UI is also poor.. BAD GAME !!!!!. cannot change the default language from what appears to be german/dutch. might be interesting if i could read the commands.. This product is by Aerosoft who I have come across before being producers of payware for Microsoft Flight Simulator. All I can say about this constantly crashing game is that it lived up to my expectations and it's performance limitations killed it stone dead - five crashes to desktop in the space of one hour. From what I understand

---

the sequel to this game is also worth saving your money over for similar reasons. Avoid Avoid Avoid .. The game physics does not work right. In other games you can look at the way the bridge collapses and make changes based on that. Not in this game. The stress screen does not even show if a part is being pushed or pulled only stress y/n. The angles that you can place gerders is supriseingly limited to just a particular grid and the menues are slow. The music is good tho.
